The size of the hammer and hardness of the tip control the duration of the impact and thus the frequency content of the excitation. Time and frequency plots for a soft, medium and hard tip are shown in Figure 2. Note that the softer the tip the longer the impact time. The harder the tip the shorter the impact time.

dragonfly dojis are similar to hammer and hanging man patterns, which are discussed later in this guide. Hammer A "hammer" is a candlestick with a small body (a small range from open to close), a long wick protruding below the body, and little to no wick above. In this respect it is very similar to a dragonfly doji; the primary difference
